HISTORY OF THE DUROC-JERSEY SWINE

It seems to be well authenticated that the exact origin or early history of the Red Hog, now recorded as Duroc-Jerseys, is not positively known. Many are of the opinion that they are purely American bred, while we have gathered much information pointing toward stock that was imported at an early date, of which we will make mention later on in this work.

It is a fact now generally conceded by all who are interested in this popular breed of swine, that there were two families of them, some years ago, one known as Jersey Reds and the other as Durocs.

JERSEY REDS.

The name Jersey Reds was probably given to this family by Joseph B. Lyman, about thirty-three years ago, who at that time resided in New Jersey, and was the Agricultural Editor of the New York Tribune. Previous to this period they had been called Red Hogs. Mr. Lippincott, of New Jersey, was the first person to advertise these hogs as Jersey Reds.

We find in Clark Petit's History of Jersey Reds, that in the year of 1832, there was a pair of Red pigs shipped from Spain to Salem, New Jersey, and he says "that their unique color at once rendered them objects of special interest in a locality long noted for successful swine breeders and feeders, among whom had long existed a great spirit of rivalry, as to whom should annually win the honor of raising the best lot of hogs, making the greatest average weight at different ages, for which leading Philadelphia butchers paid advanced price." It was soon noticed that the offspring of the Reds universally proved to be quick, profitable feeders almost invariably outweighing those of other breeds at like ages. Much of the superiority undoubtedly arose from their pre-eminent constitutional vigor and consequent capacity to properly assimilate their food.

The hogs bred in New Jersey attained great size, as will appear from the following weights made at different ages:

30 hogs, 22 months old, averaged.....	686	pounds, dressed.
18 hogs, 22 months old, averaged.....	734	pounds, dressed.
23 hogs, 20 months old, averaged.....	639½	pounds, dressed.
34 hogs, 17 months old, averaged.....	565	pounds, dressed.
51 hogs, 17 months old, averaged.....	520	pounds, dressed.
17 hogs, months old, averaged.....	862	pounds, dressed.
20 hogs, ... averaged.....	862	pounds, dressed.
20 hogs, ... averaged.....	882	pounds, dressed.
25 pigs, 8 months old, averaged.....	413	pounds, dressed.
16 pigs, 7 months old, averaged.....	278	pounds, dressed.
20 pigs, 6½ months old, averaged.....	280	pounds, dressed.

This list could be much extended, but we deem this sufficient to show an idea of the size the Jersey Reds attained and the feeding qualities they possessed.

Twenty years ago, old men in Burlington and adjoining counties, New Jersey, could not remember a time when there were not Red Pigs, neither could they tell where they came from. Mr. Brown, of Windsor, N. J., said he had seen them bred with uniformity of great size fifty years ago.

DUROCS.

In giving the history of this family of Red Hogs, we have no better authority than is given in Vol. 1 of our records and which is substantially as follows:

The Duroc family of Red Hogs were so called by Isaac Frink, a prominent farmer living in the town of Milton, Saratoga County, N. Y. In the spring of 1832, Mr. Frink took a mare to the noted stallion, Duroc, then owned by Harry Kelsey, in the town of Florida, Montgomery County, N. Y., about 25 miles away. There he saw a litter of ten red pigs, the production of a pair of red pigs brought the year before by Mr. Kelsey, from Oyster Bay, Queens County, N. Y., or imported by him from England. He moved from Oyster Bay to Florida. In regard to the importation of the pigs, the history is not authentic, although Mr. Kelsey told Mr. Frink that they were imported, but the term imported may have been improperly used, as is often the case, even at this late date.

In searching history we find that the produce of these pigs was much sought after, and assumed the name after Mr. Kelsey's famous horse, "Duroc." They spread all through the New England States, and became very popular on account of their great qualities, which we shall hereafter discuss.

In 1830, Wm. Ensign, of Wilbur's Basin, in the town of Stillwater, Saratoga County, N. Y., brought a pair of Red Pigs from Connecticut and the next year he got a few more from the same place. He bred and sold them far and near. Saratoga County was a lively "pork district" in those days, and great interest was taken in the breeding of hogs. The Frink and Ensign families of red hogs were crossed and the breed established. They have been bred ever since, with more or less care and effort at keeping them thoroughbred, but no fixed type or standard was followed (except individual ones). These hogs, according to what information we can gather, possessed most of the characteristics of the Jersey Red family, except they were not so large and were rather finer boned, and no doubt were quite profitable feeders and producers of pork.

Ex-President Thos. Bennett, of Rossville, Ill., furnishes us with some reliable evidence, which comes through a correspondence with the Hon. Cassius M. Clay, of White Hall, Ky. The honorable gentleman says: "The Spanish Red hogs were imported by Hon. James B. Clay, from Spain or Portugal, when minister to Lisbon, under Zach. Taylor in 1850. He gave me a pair of pigs the progeny of which I widely distributed, they being such very fine hogs, easily fattened, and the best hog known at that time. Being such noted hogs, it is no wonder they found their way to New York, New Jersey and all eastern and southeastern states."

It is not saying too much when we (the Red Hog breeders), say that they were the foundation stock of that most popular breed of swine, "Poland-Chinas." The Hon. L. N. Bonham, in one of his histories of said breed, in searching to find out how they came to be named "Poland-Chinas," says that "there was an old Poland who had a herd of very fine hogs, said hogs were the produce from a China sow and a Jersey Red boar. So admired were they, and so noted did they become, that they were named after the breeder (Polander), and the sow (China), hence the name Poland-China. It is a fact that the Poland-China, years ago, had red or sandy spots on them, and not very small ones either, and even at the present time some of the

best pedigreed Chinas breed sandy spots." Mr. Bennett says: "In the fall of 1889, I went to see one of the best herd of Poland-Chinas in Illinois, and there saw a boar good enough for any one. He was bred in Ohio and bought at a big price. As I was looking him over, the proprietor said: 'There is only one fault with that hog,' 'What is that?' I asked, and in reply he said: 'Some of his pigs have sandy spots on them.' This is no doubt due to the fact that, after years of careful breeding, the old characteristics will continue to crop out."

The general appearance of Duroc-Jersey swine has been much changed in the hands of our western breeders, as will be seen by the late standard adopted by the National Expert Association, at Dayton, Ohio, in February, 1889, and by the American Duroc-Jersey Association in the following November. The breed still possesses many of their old-time characteristics, which make them so popular, and as

BREEDERS

they are doubtless the most prolific of any breed of swine in existence. Young sows usually farrow from eight to ten pigs at a litter, and from ten to eighteen is not uncommon for old sows. The pigs are very strong at birth, and the sows and pigs very seldom need any attention at this time. They almost invariably impart to their offspring their wonderfully prolific breeding qualities, are good quiet mothers, supplied with a generous flow of milk, raise large even litters, and other breeds when crossed with them are greatly improved in vigor and as breeders and feeders.

Below we give some extracts from a test at the Experiment Station of the Agricultural College at Michigan.

The breeds represented were the Duroc-Jersey, the Berkshire and the Poland-China, two of each and all barrows.

The pigs were weighed every fourteen days during the experiment and the gains or losses noted and compared with the food for the period, viz.: from July 16, 1889, to January 31, 1890—168 days.

It was seen that the two Duroc-Jerseys gained in weight from the beginning. Though as fleshy as any specimens, they were still making excellent gains and were feeding well at time of slaughter. Their average gain was 36.25 pounds per period, or 2.59 pounds per day, secured at a cost of 4.65 pounds of grain for each pound of gain in live weight.

The average gain made by the two Berkshires was 29.16 pounds per period, or 2.11 pounds per day secured at a cost of 5.22 pounds of feed for each pound of gain.

The average gain per period of the Poland-Chinas was 25.91 or 1.85 pounds per day, secured at cost of 5.87 pounds of feed for one pound of gain.

The meat of the different breeds was cooked and tested, and it was the unanimous opinion of those who ate of the meat that that from the pigs making the best gains at the time of slaughter was the most tender and juicy, the sweetest and best. This was the pork of the Duroc-Jersey.

Mr. Bennett is an extensive breeder of Duroc-Jerseys, Poland-Chinas and the Tamworths, and he claims for the Duroc-Jerseys, as bred today, that they are the best general purpose hogs in the United States, having a stronger constitution, being more prolific, better sucklers, and where breeders of other breeds raise from three to five pigs to the sow, the Duroc-Jerseys raise from eight to fourteen pigs to the sow. As bred today they grow faster when young, and fatten as readily as any pig when more matured. They are the only hog today that will make their own bed, grind their own food, and when fat, carry their own carcass to market.

On motion the report was accepted and committee discharged. On motion the reading of the minutes of the last annual meeting was dispensed with as they were published in volume 34. On motion they were approved as printed.

Address of President Frazier was read as follows: "To the Shareholders of the National Duroc-Jersey Record Association. Gentlemen:—I regret very much that we haven't a larger attendance than we have and hope at our next annual meeting to see a much larger number of shareholders.

PROCEEDINGS OF BOARD OF DIRECTORS

I have no formal report to make and I do not care to take your valuable time in telling you things on which we all agree concerning our great breed of hogs, nor in throwing bouquets at our association. It's wonderful growth and increase in business speaks for themselves and I bespeak your careful attention to the reports of the Secretary and Treasurer.

I will mention, however, that Volume 36 is now being mailed out and Volume 37 will be closed in about thirty days. In this connection allow me to call your attention to the following.

Volume 35 issued under the old style contained 5,297 pedigrees and cost for printing was \$2,214.40 for 2,350 books. Volume 36 under the new style contains 10,720 pedigrees and cost for printing \$2,014.80 for 2,500 books.

While the Board realizes that it may take some little time to become accustomed to the new style volume, we also realize that it was absolutely necessary that some method be devised for reducing the cost of printing of these volumes. We feel that we have succeeded and trust that our action will meet with your approval.

I would also call your attention to what the association of the other breeds are doing for the development of the hog growing industry and especially for the advancement of their particular breeds. It behooves us to look to our laurels if we wish to maintain the wonderful lead we have over them at the present time. I hope we will have a full discussion of this matter and we should welcome any suggestion for the advancement of the breed and give them careful consideration.

It has been the aim of the Board of Directors and the President to place our association on the very highest plane to the end that a certificate of registry from this association will command the very highest respect. Looking to this end the Board directed the Secretary to enforce the rules strictly and on all alike and if there is any criticism of his actions along this line the blame, if any, should be placed on your president and the Board of Directors and not our Secretary.

I would urge that everyone familiarize themselves with the by-laws and instructions that work in the office may be hastened and delays avoided.

It is our earnest desire that every shareholder visit the Secretary's office when possible and study the methods used in handling the business of the association, and we hope that every shareholder will attend our next annual meeting wherever held and make it a "Testimony meeting" to the greatest association of pedigreed swine in existence.

In closing I wish to thank the Board and our splendid Secretary for the many courtesies extended me. I assure you that you have your affairs looked after in a business like way by them."
